

HxGN SMART Visualization

myVR Software AS, Oslo, Norway

Shaping SMART Visualization Across Sweeping Landscapes

HxGN SMART Visualization enhances communication and gives new meaning to a wide range of data types and formats through an optimised visual experience

Challenges Addressed by SMART Visualization

Accuracy

Speed

Mobility

Connectivity

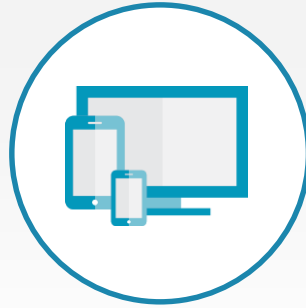

Accessibility

HxGN SMART Visualization

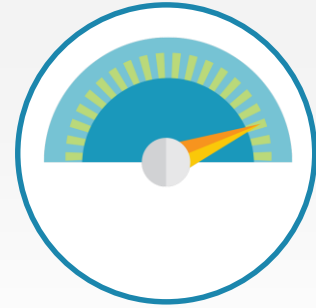

Accessibility

Quickly processes very large and disparate datasets

Mobility

Designed for use across devices

Speed

High resolution data on limited bandwidth

Accessibility

A 360-DEGREE VIEW

Integrate and overlay many different types of data streams and large datasets quickly for a more complete view

Mobility

ANY DEVICE, ANYWHERE

Designed for use in the field across a variety of platforms including mobile and AR/VR

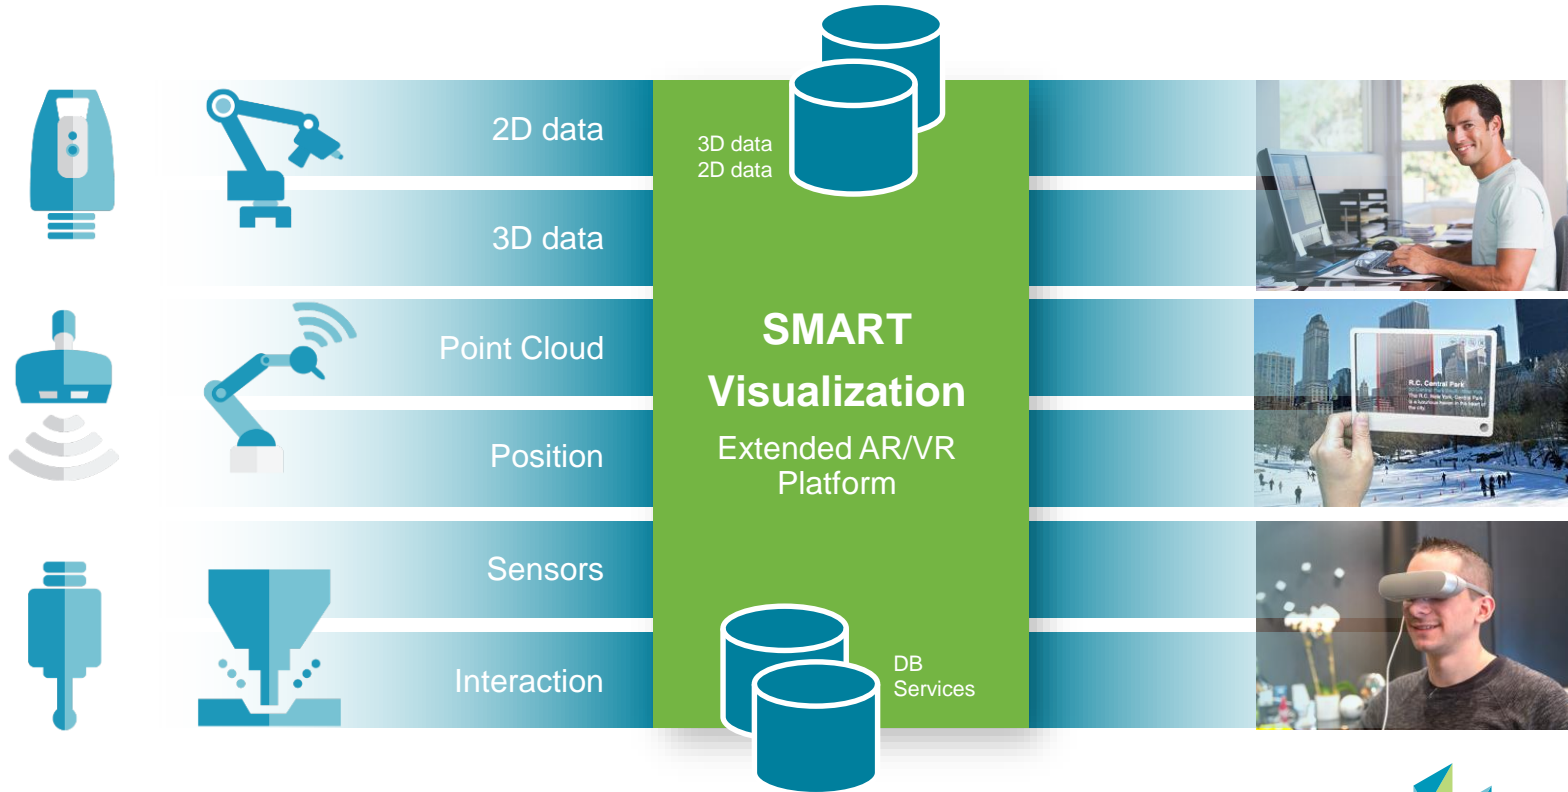

Speed

DATA FLOWS FREELY

Access information on demand at high quality across devices and varying bandwidths in the field

The Hexagon AR/VR Platform: Making it Easy

Benefits of HxGN SMART Visualization

Increase **accuracy** and present the whole picture

Optimise current device capabilities

Strengthen the quality of **intelligence**

HxGN SMART Visualization
